

What Our Customers Say...

Post job questionnaires show that 98% of our customers intend to contract with DryJect at least once for the follow season.

“With three machines working, we were able to get our greens smoothly in-play the same day. The bottom line is the DryJect method works great, and our members are happy we use it because the putting surface is playable right away.”

*Angelo Petraglia, Golf Course Superintendent / Agronomist
Deal Golf & Country Club*

“DryJect sand injection has proven to be a very useful tool for helping us maintain ideal putting conditions. It’s something we will certainly continue as part of our ongoing maintenance program.”

*Paul B. Latshaw
Muirfield Village Golf Club*

“As far as appearance, you could see that we had aerated but due to the limited ball roll disruption there were no complaints from the customers. In return, we did not lower our rates like we normally do this time of year giving us an additional \$6,000.00 over a two week period which paid for the service itself.”

*Todd Gribling, Golf Course Manager
Kemper Sports Mgmt / TheTimbers at Troy*
