Dear Ken:

On behalf of Fletcher's Fields, I want to express our gratitude for your assistance in the field preparations for the recent games between Canada and France and Canada and Wales. You will appreciate that as the venue for matches of this calibre, one of our primary concerns was the condition of the pitch. Stan Woodburn our groundsman, has made me aware that your advice and guidance in preparing the field for these early season matches was invaluable and your contribution in terms of time and effort was well beyond what we could reasonably have asked for. We noted your personal efforts on the mower to ensure a field not only in good condition, but spectacular in appearance as well. You should know that immediately following the Wales game I was approached by a senior groundsman from the New Zealand Rugby Union who enquired as to our field preparation as he believed the pitch to be very well presented.

While we are endeavouring to be as professional as our limited resources will allow, only your gratuitous efforts allowed us to be so well prepared.

Yours truly

John Reich
President
